

Indusoft Web Studio SCADA / HMI – 2010 award winning HMI software !

S O P H I S T I C A T E D ® A U T O M A T I O N

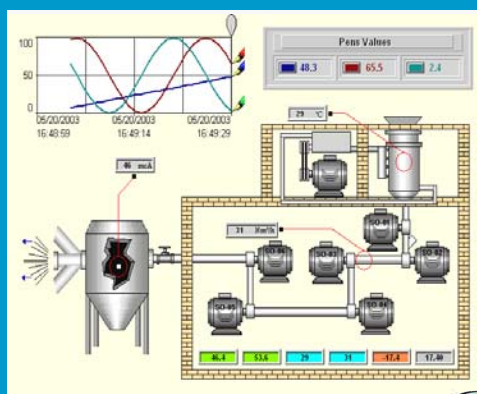

Indusoft Web Studio

Cost-effective SCADA / HMI for small-to-large size projects.

Web Studio is best HMI software according to e.g. year 2010 Control Engineering magazine's readers award.

Same development environment for creating Windows XP/Vista/7/CE and Web applications

Web Studio enables you to create native Windows NT/2000/XP /Vista/7/CE and Web-based applications – with no other tools required.

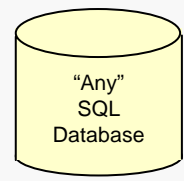

You can use Web Studio as SCADA in large process control systems, complex RTU applications or just as stand alone machine or device interface. All the tool are included! Fully open platform.

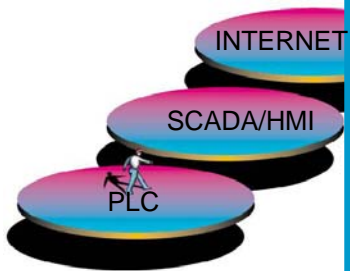

Remote Web Users

Over 200 drivers, trends, alarms, reports, OPC client/server, ODBC, web interface, all included in standard package.

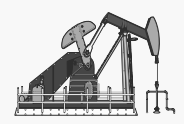

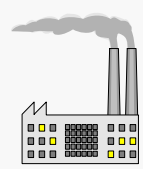

Web Studio is running in all Windows platforms

Web - Ready SCADA

>200 communication drivers

AutoLog PLC Series
AutoLog GSM-RTU Series
AutoLog RTUs

Connects with almost any PLC or other device or software.

Web Studio SCADA with AutoLog hardware and Windows CE touch screens builds up the complete rock solid and multi-featured solution for your small-to-large size automation project cost-effectively!

Indusoft Web Studio SCADA / HMI – 2010 award winning HMI software !

Indusoft Web Studio

- Same development environment for creating Windows NT/2000/XP/Vista/7/CE & Web applications
- Includes more than 200 device drivers (Modbus RTU/ASCII/PLUS/TCP, Profibus DP/FMS, OPC Server/Client...)
- View multiple Web Thin Client applications from a common Web Browser (such as Microsoft Internet Explorer) through the Internet/ Intranet and exchange data with a server using a TCP/ IP protocol
- Easy to use interface to almost any third party SQL databases, such as Oracle, MS SQL server, MySQL, MS Access
- Contains powerful and flexible tags database
- Imports and exports recipes, reports and real-time data in XML format
- Supports ActiveX for Web Thin Clients
- Integrates seamlessly with Windows desktop applications (such as Microsoft Word and Excel)
- Interfaces to other third-party packages such as Java, C++ and Visual Basic
- Provides on-line configuration and remote management and -debugging via TCP/IP
- Provides extensive development support tools such as message register, error codes, event codes, Database Spy, and Logwin
- Advanced math library has more than 100 standard functions (Arith, Stat, Logarithmic, Logical, String, date&time, trig, screen, security, file, multimedia, database, loop, ODBC, e-mail, dial-up, ActiveX etc.)
- Programming is via flexible and easy-to-use scripting language
- Provides multi-level security for applications, including use over Intranets and Internet.
- Conforms to industry standards such as Microsoft.NET, OPC, DDE, ODBC, XML, SOAP and ActiveX
- Provides automatic language translation at run-time
- Allows internationalization using Unicode
- Supports OPC (server & client) and various PC control packages

TRENDING

- Keeps track of process behavior online or through historical trending

GRAPHICS

- Creates sophisticated interfaces with point and click, drag and drop ease
- Imports graphics from more than 15 different formats for enhanced and realistic screens
- Supports more than 40 pre-defined dynamic effects; including shadowing, foreground and background color, blinking, fill, rotation, motion, scaling, text, and animation Uses an extensive symbol library to simplify development
- Provides an object-oriented environment for simple application and screen development and reusability

ALARMS

- Sophisticated alarms management system allows you to send alarms to various utilities such as screen, e-mail, GSM phone, Web browser, and archive.
- Provides free format alarm messages, uses secondary search keys, and accesses through groups or tags
- Archives alarms to a file, printer, or to a database

RECIPES AND REPORTS

- Creates flexible, user-defined recipe groups
- Provides user-configurable reports, including text and graphics, that can be displayed in an application or on the Web
